Metal PolyCore Panels

Durable, Reliable and Versatile

Our Metal PolyCore panels (also known as Aluminum Composite Panels, or ACP's) incorporate a high quality, high density thermoplastic core made only with virgin material, which provides much greater strength than those with recycled cores. The aluminum overlays we use allow us to create a solid, durable panel with a variety of uses. Most commonly used for sign applications, our panels can also be used for ceiling panels, decorative walls, and other applications to add color and durability to your space. These panels are extremely durable & scratch resistant, and are even re-usable. In addition, these panels resist moisture, stains, odors, chemicals and clean easily with steam, high pressure sprayers or soap and water.

Product Features

- ✓ Standard panels include G/1 (Factory Finish 1 Side, Primed other), G/2 (Factory Finish 2 sides)
- ✓ Factory Applied Protective film is easy to remove and protects against scratches
- ✓ Dual-sided Aluminum for strength and rigidity
- ✓ NO Surface Prep required for use as sign panels
- ✓ Reusable
- ✓ No edge caps needed (but caps are available if desired)
- ✓ Extremely Durable and Impact resistant
- ✓ Low Maintenance & Washable
- ✓ Lightweight and Economical
- ✓ Resists scratching and denting better than MDO, Wood, or Fluted Core panels
- ✓ Standard and Insulated options
