

Fire Rated FRP Panels

CLASS A FIRE RATING AS TESTED PER ASTM E-84

Class A Fire-Rated Fiberglass Reinforced Plastic (FRP) panels are a high-performance solution designed for environments where fire safety is a critical concern. These panels provide exceptional strength, durability and resistance to moisture and chemicals while meeting stringent fire safety standards.

- FIRE RESISTANT
- HIGH STRENGTH
- MOISTURE RESISTANT
- EASY TO CLEAN
- CHEMICAL RESISTANT
- UV RESISTANT
- ENHANCED SAFETY
- LONG LASTING
- COST EFFECTIVE
- HYGIENIC
- VERSATILE
- AESTHETIC APPEAL

SUGGESTED APPLICATIONS & USES

Commercial

Ideal for wall and ceiling cladding in restrooms, kitchen and storage areas where fire safety is paramount.

Healthcare

Used in hospitals, clinics and labs for their fire resistance and hygienic properties.

Food processing

Perfect for food preparation and processing areas due to their easy-to-clean and fire-resistant surfaces.

Industrial

Suitable for manufacturing plants, warehouses, and clean rooms where both

durability and fire safety are required.

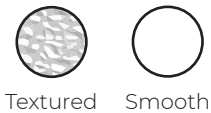

Public buildings

Applied in schools, offices and other public buildings to ensure safety and compliance with fire regulations.
