

Laminated HDPE Panels

SIMPLE, DURABLE, RELIABLE & EASY TO MAINTAIN

Laminated HDPE Panels are a highly durable and adaptable solution for a wide range of applications. By combining the strength of High-Density Polyethylene (HDPE) with the structural support of plywood or OSB, these panels offer superior impact resistance, wear protection, and chemical durability. This makes them an ideal choice for demanding industrial, commercial, and agricultural environments.

- DURABLE
- IMPACT RESISTANT
- MOISTURE BARRIER
- CHEMICAL RESISTANCE
- LOW MAINTENANCE
- CORROSION RESISTANCE
- HIGH TENSILE STRENGTH
- COST-EFFECTIVE
- SHATTER RESISTANCE
- RECYCLABLE

SUGGESTED APPLICATIONS & USES

Animal Enclosures

Ideal for lining pens, stalls, and barns where durability, impact resistance, and easy cleaning are required.

Dairy Barns

Suitable for environments exposed to moisture and wear, providing both durability and ease of maintenance.

Fabrication Areas

Suitable for walls and partitions in manufacturing spaces, providing a sturdy and low-maintenance solution.

Walking Areas

Treaded (Quad Ripple) HDPE can be used for scaffolding and other walking areas.

Clean Rooms

Perfect for wall and ceiling cladding in environments where hygiene and ease of cleaning are critical.

Food Prep Areas

Used for wall and ceiling cladding, providing hygienic and easy-to-clean surfaces that meet food safety standards.
